**Subject:** Two Rivers Trail

Hi Tim,

I am writing to express my support for the staff recommendation to make an exception to the district's recreational trails policy for this project and allow the next phase of the Two Rivers Trail to utilize the top of the levy for the 400 yards where the area down below is not feasible.

I am a resident of the McKinley Village development and my wife, child, and I regularly use the first phase of the trail. It would be a great asset to us and the community as a whole to connect the existing bike trail east of CSU Sacramento to the segment by Sutter Park.

Thanks so much for your time

-Mike Fraumeni

**Subject:** Two Rivers Trail Phase II Extension - vote of support

Dear Mr. Kerr,

I am a resident of Sacramento. I work and leave in the 95816 Zip Code area. I am writing in light of this Friday's hearing to consider the City of Sacramento's request for an exception to the recreational trails policy to allow for the building of an extension between H Street and Sutter's Landing. I am writing to express my hope that the Board of Trustees grant the request for an exception to the recreational trails policy to allow for the construction of this extension. Sacramento's future and the safety of its residents depends upon accessible bike and walking trails which keep cyclists and pedestrians off busy city streets.

I am sure you have heard of the tragic death of two Carmichael residents who were hit this week as they were out for a morning walk. Those deaths could have been avoided. The Board of Trustees should ensure it facilitates all efforts to create a climate that is safe for cycling and walking and encourages both.

If this extension were granted, I would feel much safer cycling to work each day.

I appreciate your assistance on this important matter.

Regards,  
Barbara Cotter

Good afternoon,

I am writing you to express my support for the Two Rivers Trail Phase II section, connecting Sutters Landing with River Park. I am a cyclist and travel predominately by bicycle. As such, I use Sacramento's existing bike trails for daily commuting through the week, as well as recreation on the weekends. However, given this year's rains the trails have been flooded and I must use surface streets with cars. Having an additional bike path on the south side of the American River will be essential for creating a robust cycling infrastructure so as to increase the number of commuters by bicycle, like myself.

Best,

Kevin Woldhagen

**Sent:** Wednesday, March 27, 2019 7:05 PM  
**To:** Tim Kerr  
**Subject:** urging support for Two Rivers Trail Phase II

**Importance:** High

Mr. Kerr, I'm a resident of 1515 26<sup>th</sup> Street in Midtown Sacramento (95816) and I'm writing to urge the board of trustees of the American River Flood Control District to grant the City of Sacramento's request for an exception to the district's recreational trails policy for the Two Rivers Trail Phase II.

The completion of this trail will provide a badly needed transportation and recreational link from River Park and East Sacramento into Midtown and Downtown Sacramento. This link will provide a safer, faster, and more appealing route for bicyclists traveling to and from work, to and from parks along the south shore of the American River, and to and from California State University Sacramento.

Thank you for considering this important request by the City of Sacramento.

Dear Mr Kerr,

I'm a resident of Campus Commons, where we have American River Trail access of great recreational value. I'm writing to urge the board of trustees to grant the City of Sacramento's request for an exception to the district's recreational trails policy for the Two Rivers Trail Phase II.

For the past 50 years the top of the levee through River Park has been heavily used by River Park residents and others for walking, dog-walking, running and biking.

As you know, the top of the levee is wider than usual in this area — about 20 feet – and could safely accommodate an 8-foot-wide paved path and unpaved shoulders on each side. The paved trail would not weaken the levee or interfere with the operation of maintenance equipment.

Thank you for your consideration.

**From:** Andy Alexis <aalexis@gmail.com>  
**Sent:** Thursday, March 28, 2019 7:14 AM  
**To:** Tim Kerr  
**Subject:** Support for the Two Rivers Trail

I have resided at 5329 Sandburg Drive in River Park for 34 years; the American River levee is just beyond our back fence. I have enjoyed the fruits of your agency's diligence and have had some informative conversations with your crews as they perform their tasks. I have a lot of faith in your agency.

I urge you to support the City's request to allow the 1/4 mile bike trail on the top of the levee near the Business 80 bridge. I have been a bicycle commuter to my job downtown for over 20 years. In River Park, the treacherous J/H/Carlson intersection is hazardous to bicycles and to pedestrians alike, so a safe off-street route to the downtown area would be of great benefit to me and to many others.

Thanks to SMUD's recent tree clearances, for the past 3 weeks I have had a clear view of the levee top from our living area during the evening hours. I see a lot of bicyclists, runners and walkers using top of the levee. (I understand that bicycle riding is technically illegal, but I have never seen it enforced).

Whether or not the portion of the levee under discussion is paved or not, those levees will continue to be heavily used by all walkers, runners, bicycles, and dogs. If it is paved, I would have to ask what specifically is it that impedes the District's work: the people? the bicycles? or the pavement itself? If the issue is the walkers/runners/bicyclists, then there is a simple way to ensure the District's access, and that is to gate off that section of the levee and to have the Rangers started writing citations for off-road bicycle use. If it is the presence of pavement, then the engineering data that shows how its presence degrades the integrity of the levee should be shared.

There are many places in which the top of the levee is paved and is used for a bike trail: between the Fair Oaks/J Street bridge and the Guy West Bridge, along the Sacramento River from Old Sacramento to the Land Park area, and the paved portions on the north bank of the American River between Howe and Watt avenues. Surely there is a wealth of experience from these areas that can be applied to the question at hand.

Dear Tim,

As a resident of East Sacramento, and someone who lives within 1500 ft of the proposed Two Rivers Trail Phase II, I am writing to express my support for the exception to the district's recreational trails policy for this project. I am an avid bicyclist and trail runner, as well as a long-time resident who uses the trail and the levee path regularly. I have thoroughly enjoyed the improvements that have been made to Sutter Landing and would like the ability to ride my bike from my doorway up to the trail within 5 minutes. The American River Parkway is a gem for the City of Sacramento, and I would like to make it accessible for more people. I also am a bicycle advocate who would like to have safer and well used paths to encourage bike riding whenever possible.

Please feel free to contact me if you have any questions.

Sincerely,  
Amy

Mr Kerr,

I'm a resident of 2410 V St and I'm writing to urge the board of trustees to grant the City of Sacramento's request for an exception to the district's recreational trails policy for the Two Rivers Trail Phase II.

Thank you for your time,

Amy K. Goad

**Subject:** Supporting the proposed Two Rivers Trail Phase II

Dear Mr Kerr,

I'm a resident in the American River Flood Control District at 406 22nd Street, Sacramento. I'm writing to urge the board of trustees to grant the City of Sacramento's request for an exception to the district's recreational trails policy for the Two Rivers Trail Phase II.

The Sacramento River is a treasure and a defining characteristic of our city. Its banks should be available to and connected to the rest of the City and to the American River.

Thank you

Carol Greenwood

Mr. Kerr,

I am writing to express my support for creating a paved link between the American River Parkway bike trail and Midtown. As a Midtown homeowner and resident, I have seen the positive impacts of improvements to biking infrastructure. This is not a purely recreational use of the potentially paved area, but also a link providing the possibility for bicycle commuters to access parts of the city that are currently cut off.

Thank you for your consideration of my opinion,

Catherine Turner

**Subject:** 2 rivers trail Phase II

This short distance will allow more eco-friendly transportation to midtown and downtown.

Thanks, Beverly D. Thomas

The [Two Rivers Trail Phase II](#) will create 2.4 miles of paved walking and biking path along the south side of American River Parkway near River Park. It closes a crucial missing link in Sacramento's bikeway network between the American River Parkway bike trail and the Midtown Grid by creating a continuous, car-free route for biking along the south side of the river.

Dear Mr. Kerr,

I was recently informed about the City of Sacramento's request for making an exception to the district's recreational trails policy for the Two Rivers Trail Phase II. I am writing in support of this request and hope that the board of trustees will grant this request. It would be really beneficial from a recreational, public health, and climate perspective to have a more complete network of bicycle paths and trails, particularly in completing gaps currently existing.

Thanks in advance!

Dan

I support the paved bike trail expansion through River Park. There is little in the way of developed recreation access along the river in East Sac/River Park. Paradise Beach only has trash cans-no picnic tables. There are no developed hiking trails. It would be very nice to have a paved path that connected up the west side of the river.

Mr Kerr,

I live in Curtis Park (95818) and ride a bike almost everyday in commuting and recreation. I moved to Sacramento from the Bay Area over 30 years ago in large part due to the world-class American River Parkway. I'm writing to urge the board of trustees to grant the City of Sacramento's request for an exception to the district's recreational trails policy for the Two Rivers Trail Phase II.

Respectfully,

**Subject:** Please approve Two Rivers Trail extension

I writing as a resident of the Land Park neighborhood of Sacramento and I urge the trustees to approve the request by the City of Sacramento to extend the Two Rivers Trail atop the American River levee.

The extension would provide a needed alternative route between the downtown / midtown area of Sacramento and the eastern portion of the American River Bike Trail including CalExpo and Sac State. The alternate route is particularly valuable when high water levels cause flooding of the trail around Northgate Blvd.

Thank you for consideration.

Bill Leddy

**Subject:** Support of Exception for Two Rivers Trail Phase II

Hi Mr. Kerr,

I am a River Park resident writing to voice my strong support of allowing an exception for the Two Rivers Trail Phase II to pave the levee top for approximately 400 yards where a sufficient levee base does not exist.

I'm in support of paving the trail and allowing an exception for the following reasons:

1. My kids and wife aren't comfortable riding their bikes along the current gravel and dirt paths, and would enjoy the opportunity to utilize a paved trail near our house and among the River for recreation.
2. I am an avid bicycle commuter and paving this trail would make it more accessible for those like me, as well as recreational bicycle riders and joggers/walkers, who would like a safer, motorized vehicle-free alternative to ride our bikes to mid-town. As you may be aware, there was a recent pedestrian fatality on H street in East Sacramento due to a collision with a motorized vehicle. There have been other fatalities in the past. H Street is a typical route for cyclists to get to mid-town because there isn't currently a safer alternative.
3. My elderly mother, who is currently living with us, is unable to access the trail due to disability. Paving the trail and building the planned ADA accessibility would allow her to enjoy this resource.

Thank you for your consideration.
