1. INTRODUCTION

The Flood Maintenance Assistance Program (FMAP) is a program that provides state funds for eligible maintenance activities with Local Maintaining Agencies (LMAs) including Maintenance Areas (MAs) to help obtain acceptable maintenance of the State Plan of Flood Control facilities (levees, channels, and structures). The purpose of FMAP is ensure State Plan of Flood Control (SPFC) facilities are properly maintained with sufficient resources (including funding) to meet Code of Federal Regulations, Title 33, section 208.10 (33 CFR 208.10), and applicable Operation and Maintenance (O&M) manual requirements.

The FMAP will partner with LMAs to work towards sustainable O&M by:

- Providing State funds to LMAs to reduce the accumulation of deferred maintenance.
- Providing technical assistance to enable the LMAs to effectively perform the maintenance activities in an efficient manner.
- Securing new Operation, Maintenance, Repair, Rehabilitation, and Replacement (OMRR&R) assurance agreements between LMAs and CVFPB.
- Promoting consolidation or regional governance of LMAs, so SPFC facilities can be more efficiently and effectively maintained.
- Sustaining and improving eligibility for USACE PL 84-99 Program and ultimately compliance with USACE O&M manual requirements.

Selection for participation and funding under FMAP will be determined by information requested in the questionnaire that will confirm and verify the LMAs willingness to pursue and obtain a PL 84-99 eligibility and having sufficient funding to perform OMRR&R activities annually.

2. REQUIREMENTS AND LIMITATIONS

All LMAs are required to meet all the following criteria to receive FMAP funding:

- Levee must be within State Plan of Flood Control (SPFC).
- Applicant must have current compliance with PL 84-99, existing USACE Letters of Intent/System Wide Improvement Framework plans (LOI/SWIF) or commit to compliance by submitting a LOI and SWIF plan through FMAP.
- LMAs must provide a copy of an existing SWIF or LOI with the USACE.
- In areas where USACE System includes multiple LMAs, coordinate and collaborate among the LMAs to ensure the submittals meet the requirement for the USACE LOI/SWIF for the project area. Regional Flood Management Assistance Program (RFMAP) funding can be used for coordination activities.
- LMA must execute a new assurance agreement (OMRR&R) with CVFPB for the entire jurisdiction of the LMA.
- LMA must meet all California Department of Water Resources (DWR) flood reporting requirements, such as Assembly Bill (AB) 156 (Stats. 2007, ch. 368).

- LMA must work with the region to find solutions for more effective and efficient delivery of the required O&M for SPFC facilities.
- LMA levee is not or is not anticipated to receive Early Implementation Program/Urban Flood Risk Reduction Program (EIP/UFRR) and/or USACE project repair or improvement funding.
- If LMA is entitled to receive Delta Subventions funding, no O&M funding will be provided. LOI/SWIF funding will be limited to what is needed beyond the planning funds provided by the Delta Subventions program.

3. FUNDING

Available funding for eligible participants will be made available in Fiscal Year 23/24 for the following activities:

1. DWR will fund \$20,000 per LMA for preparation of a USACE LOI/SWIF, if the LMA is willing to commit to complete the process. If the LMA already has a LOI & SWIF in place, which means they are currently eligible for PL 84-99, funding under this item can be allocated for additional identified OMRR&R activities.
2. DWR will fund \$20,000 per LMA for preparation of technical/engineering reports needed to secure sufficient funding to manage their SPFC system to meet the requirements in Code of Federal Regulations, Title 33, Section 208.10, O&M Manual, and new OMRR&R agreement, if they are willing to commit to complete the process. If the LMA is already well funded and does not have an Unacceptable Rating from State Annual Maintenance Inspection or a recently passed a Proposition 218 Election, LMA may use the funding for additional identified O&M activities.
3. DWR will provide matching funds, up to an identified amount needed for O&M activities, for dollars spent during last fiscal year for O&M activities based on the formula below. Only LMAs participating in items #1 and #2 above are eligible to receive the additional funding.
 - 75% matching funds for the first \$10,000 per mile expenditure.
 - 50% matching funds for expenditures in excess of \$10,000 per mile.
 - All funding will depend on the program demand and fund availability.

Funds will be advanced for the LOI/SWIF and Engineering Report (items 1 & 2 above). Funds may be advanced on a one-time annual basis for the O&M activities following approval and verification of funding agreement.

Costs *eligible* for funding through this program O&M activities include the following:

- Gravel for access roads and levee crown
- Rock slope protection (RSP) for minor embankment repairs
- Minor seepage control repairs

- Minor stability repairs
- Vegetation management
- Rodent abatement
- Flood control structure/facilities upgrades
- Gates/fencing maintenance

Costs *not eligible* for funding through this program include the following:

- Administrative personnel
- Purchase and maintenance of general use vehicles
- New facilities
- Utility cost reimbursement
- Administrative overhead charges
- Travel or commute costs
- Non-SPFC O&M activities

4. SELECTION CRITERIA

All LMAs are potentially eligible to receive FMAP funding if they are willing to take the necessary actions to be eligible for PL 84-99 and secure sufficient funding to perform the required OMRR&R activities annually. The program is designed to support the LMAs to be successful in carrying out their responsibilities under OMRR&R. The level of funding and what the funding can be used will depend on the submittal listed below.

5. TIMELINE

Considering the level of information requested, the request for funding will be reviewed if the PSP is received by a given date. Submittals received by the established date will be reviewed and considered in the order received. If the funding is exhausted requests received after that point will be denied.

The following date is the established cutoff for the FY 23/24 funding cycle:

- August 31, 2023

Please provide the following project information:

- **Briefly describe the leveed area (USACE system) and what is protected within the project basin.**

The American River Flood Control District's (ARFCD) levee system protects an urban population, commercial and residential properties and infrastructure. There are three levee systems, collectively referred to as the ARFCD North Area systems: Dry Creek Right Bank, referred to as the Dry Creek Levee System. Dry Creek, NEMDC, Arcade Creek referred to as the Robla-Arcade Levee System. American River Right Bank, NEMDC, referred to as the American River North Levee System.

- **Explain how you intend to become compliant with the SWIF process and USACE and DWR inspections.**

The American River Flood Control District (ARFCD) is still active in PL 84-99; however in anticipation of being dropped to inactive status, ARFCD submitted a Letter of Intent (LOI) to the United States Army Corps of Engineers (USACE) for approval. Based on Corps feedback, edits are being made to the LOI. Once the LOI is approved, ARFCD plans to complete its System-Wide Framework (SWIF) document including an updated list of items corrected by the District. ARFC will submit a draft to both Central Valley Flood Protection Board (CVFPB) and the USACE for review. Once comments are incorporated the ARFCD will submit the final SWIF to the CVFPB for submittal to USACE; this may or may not occur within the timeframe of this funding cycle, depending on the review time by the CVFPB and USACE.

- **Please provide verifiable and detailed information of eligible OMRR&R activities and projects conducted by the LMA the last two full years.**

See the attached 2020-2021 and 2022-2023 budgets.

- **Provide a list of eligible OMRR&R activities and projects that you intend to conduct or construct.**

Minor Erosion Repair, Encroachment Maintenance, Vegetation Removal, Debris Removal

- **Please prioritize the activities and detail the scope of the projects. This includes project description, proposed schedule, and proposed budget. Budget details must include personnel, equipment, and material costs.**

Minor Erosion Repairs: Erosion repair work will take place prior to the flood season, unless required as an emergency measure. **Encroachments:** Abandoned encroachments will be addressed prior to the flood season. **Vegetation:** ARFCD will perform standard vegetation maintenance. They will also identify any trees that are in an advance state of decline that should be considered for removal. ARFCD will remove those that could most impact the integrity of the levee. High hazard trees will be removed between July and February to avoid nesting bird season. **Debris:** as needed, debris, including trash, will be removed from the levees. The District anticipates spending close to \$2M on levee maintenance.

- **Describe the project benefits and how it works toward USACE and DWR levee inspection compliance.**

Erosion, excess vegetation and encroachments can harm the structural integrity of levees, obscure visibility, impede access for maintenance and inspection, and hinder flood fighting operations. Correcting these issues help with passing the DWR and USACE inspections.
