

**American River Flood Control District  
Central Valley Flood Protection Board Permit Application  
American River Bridge Widening (CalTrans)**

**Staff Report**

**Status Update:**

This item is being pushed to the March 2021 Board meeting.

The applicant for this permit has requested that the Board postpone its review of the application until March 2021. CalTrans intends to have the final environmental document for the project released by that time and wants the review of this request to coincide with the release of the environmental document.
